

One to One LEARNING

MACQUARIE ANGLICAN GRAMMAR SCHOOL

WHY

The program allows for a transfer in the ownership of learning to students by providing them with the opportunity to collaborate, communicate and research on a global level in real time. Personalised technology allows our teachers to deliver lessons using various teaching styles which range from setting specific online tasks to giving open-ended tasks where students are expected to find the solution independently.

The One to One Learning program provides students with access to expanded, global resources and content but also gives students the opportunity to take ownership of their learning and approach to creative problem solving.
